Our Mission

Our mission is to expand holistic healthcare to individuals in underserved income populations, healthcare workers and emergency service providers to aid in the collective healing and wellbeing of the Individual and community.

Mission Details

Our goal is to facilitate the healing journeys of individuals that wouldn't have the opportunity to personalized 1:1 holistic care of their physical, emotional, psychological and spiritual wellbeing. Our mission also seeks to serve those who are in the healthcare and emergency services such as fire, police, military, veterans, first responders and hospital employees, as these are the caretakers that give and give until they break. We are focused on supporting the healing process for this population as a way to refuel them in their tireless efforts. Each individual will be supported with treatments that are tailored to their needs, wherever they are in their healing journey. Using an Eastern/Western medical mindset and various holistic, energetic, harmonic and physical therapeutic modalities, with compassion and grace, it is our intention to assist these individuals toward balance and personal alignment within themselves. This leads to healthier, happier, more productive people, each creating a ripple effect of collective harmony, connection and balance in our community

Our Vision

The ultimate vision of this Public Charity is to provide a safe sanctuary of healing to a population that wouldn't otherwise have access due to personal economic limitations as well as those who are serving the greater good of health and protection. The vision is to facilitate healing of body, mind and spirit. We all carry wounding and trauma of some sort through our lives and collect more as we go. These populations are either neglected from monetary restriction or a personal denial of care stemming from the need to care for others, which puts the caregiver/protector last. These populations share a common thread as these caregivers engage with many in the restricted income population due to lack of overall health and wellbeing access. It is our vision to connect communities through a dual ripple effect of self-awareness through healing physical, emotional, and spiritual dysfunction and trauma. It will start with the individuals healing journey through both populations, then through the personal alignment of the individual, we raise the level of community cohesiveness through the ripple effect. Ultimately, we are creating a collective connection of compassionate, wise and truly healthy people who have expanded and transformed through the healing of their physical body, psychological/emotional mind and energetic spirit.

Community Support

We are calling on everyone in the community to be of service in any way you can.

We are looking for volunteers to lead classes throughout the week so that these populations can take a time out for themselves and know they are supported by their community they work so hard to serve.

We are also always very grateful to except the donation that fits your ability, which can be made on our site as a one time donation or a Sustaining Member with a monthly contribution of your choice.

All donations are 501(c)(3) deductible and go directly to supporting these populations with 1:1 treatments for their wellbeing and personal healing. 💙
